

Links Mix

FORMULATION

- 25% hard fescue
- 25% sheep fescue
- 25% creeping fescue
- 25% chewings fescue

NOTABLE CHARACTERISTICS

- Medium dark green color
- Very fine textured leaf blades
- Establishes in 10-21 days
- Excellent disease resistance
- Excellent for overseeding or interseeding
- Use in full sun to partial shade
- Grows to 15" and then lays over to give a "heather" look
- Works on poor soils
- Fertility requirements are low

SEEDING RATE

New Lawn 4-6 lbs/1,000 sq. ft. or 200-250 lbs/A
 Overseeding 2-3 lbs/sq. ft.

NITROGEN RATE

0.1-0.3

Sunlight needed	Full Sun-Partial Shade
Soil Types	Most
Maintenance	Low-Medium
Fertility	Low-Medium
Traffic	Poor-Good

NOTES ON LINKS MIX:

Links Mix is a low-profile turf grass blend developed for low maintenance applications, soil erosion, and weed control. Links Mix combines the strength of hard fescue, chewings fescue, sheeps fescue, and creeping red fescue to produce a turf seed mixture ideally suited for sites requiring an attractive, high quality, minimal maintenance grass cover.

Links Mix performs very well in low fertility situations, and provides excellent cover in both open and shaded areas. It is also widely adaptable to droughty situations and hot weather stress. This mix also offers the cold weather tolerance required for northern zones of the country.

Links Mix helps prevent soil erosion, suppresses broad-leaf weeds, and reduces the need for mowing and herbicides. It is ideal for roadsides, parks, and many municipal, industrial, and commercial uses where infrequent mowing is desired or required.
