

Partner Pea/Oat Mix

FEATURES

- 60 days from emergence to harvest; best when oats are in the boot stage
- High quality haylage
- Great nurse crop for a forage seeding
- Fits well before or after a summer annual crop
- Tolerates frost or light freeze
- Spectacular yield & quality with Haywire Oats

ANNUAL MIX FEATURES

Plant type: Annual mix
Planting dates: March–April, Aug
Soil pH: 6.0–7.0
Soil adaption: Wide
Planting depth: 1”
Approximate seeds/lb: 8,000–9,000
Seeding rate: 100-120 lbs/A ; 70 lbs/A nurse crop
Days to germination: 7–10
Main usage: Baleage, silage, nurse crop
Height at maturity: 2’–5’
Length of stand: 1 cut
Reproduces by: Seed

FORMULATION

50% Haywire Forage Oats
50% Stockade Forage Peas

Adding peas to oats increases crude protein by 3-5 points, and decreases NDF by 5-8 points.

Enduro-Plus consists of only the best forage varieties available. All varieties in the Enduro-Plus product line have been developed and tested for forage quality, yield, and persistence. These products have been designed to give you higher relative feed values, which translates into more milk per acre, more beef per acre, or more energy for horses.
