Use Around Vegetables and Landscape Beds and Trees and Shrubs

Herbicide Granules is 1.47% Trifluralin also known as Treflan. This is also the same strength as the well known name brand that all the box stores carry.

This prevents weeds and grasses for up to 6 to 8 weeks. To get 6 to 8 weeks out of the preventer the product **MUST be incorporated** (worked or scratched) into the soil. If the product is sprinkled over the soil and just watered in the preventer will last only 3 to 4 weeks.

Apply every 4 to 6 weeks to maintain a continuous barrier.

Don't forget the 15 lb bag for larger gardens or repeated applications. Item number 21748

Use in Ornamental Landscape Areas, Not Around Vegetables!

When you want to prevent weeds and grasses, but you are NOT using it around vegetables, your best choice is **Ornamental Weed Preventer** or **Turf and Ornamental Weed & Grass Stopper**. (see pictures below)

These are the same great chemical, Dithiopyr also known as Dimension.

This does NOT have to be worked into the soil. Simply sprinkle on top, water it in and it will prevent weeds and grasses for 3 to 4 months.

This can be applied on top of; fabric, rock, bark, mulch any landscape material.

Use around; trees, shrubs, flowers, both annuals and perennials, roses and much more.
