

## Scav-N-Ger Radish

### FEATURES

- Scavenge leftover nutrients
- Reduce soil compaction
- Promote water infiltration
- Increase earthworm activity
- Improve soil biology
- Suppress weeds
- Potentially reduce use of chemicals and tillage

SCAV-N-GER® brand cover crop radish produces a significant root mass. This extra large root system allows SCAV-N-GER® to pull nitrogen and other nutrients from deep within the soil and bring them back to the surface. Upon decomposition, these roots leave large channels in the soil that improve water infiltration and soil aeration. Tests have shown that cover crop radish can scavenge over 150 lbs of nitrogen per acre. The scavenged nitrogen becomes available to the next cash crop or increases soil organic matter.

### PLANTING TIPS

**Planting Rate:** 8-10#/acre 3-5#/acre when mixed with legumes and/or grasses.

**Planting Depth:** 1/4 - 3/4 inch

**Aerial Seeding:** Aerial seed into soybeans before leaf drop (~1/2 leaves yellow) and into corn when the corn is dried up to the ear (for ~50% of sunlight to reach ground between the rows). Apply 60 units of N or manure for best root growth potential.

**Planting Time:** Seed from early August to September (earlier in the north and later in the south)

SCAV-N-GER® works well in mixes and makes an excellent home for earthworms.

### NOW WITH PINNACLE QUICKSTART COATING!

Expect the following from Pinnacle Quickstart:

- Increases seed & seedling survival
- Establishes a microenvironment for stimulating vigorous growth in young seedlings
- Achieves better seed to soil contact to aid germination
- Hygroscopic nature of the coating pulls & holds moisture to the seed, aiding germination
- Encapsulates each seed in a carefully formulated mix of minerals & selected nutrients
- Specifically formulated micronutrient package of Fe, Mg, & Zn
- Coating disguises seed for less bird predation
- Colorant on the seed improves monitoring of area seeded & seeding rate
- Increases stand & survival under adverse conditions
- Added weight from coating material:
  - Makes seed larger & easier to handle & distribute evenly
  - Less puddling of seed – seed stays put in over-watering conditions
  - Penetrates stubble or thatch for better seed to soil contact
  - Increases spread width up to 40%

Get better, more consistent stands with Pinnacle QuickStart.
