Rapid Turf Mix

Stock #	Size	Price
9FAST	50lb	\$1.75/lb

FORMULATION

75% Proprietary Perennial Ryegrass
(3 improved varieties)
25% Proprietary Kentucky Bluegrass

NOTABLE CHARACTERISTICS

- Excellent performance and turf quality
- Dark green color with fine leaf blades
- Use in full sun
- Medium maintenance required
- Excellent disease resistance
- Quick germination from ryegrasses

Rapid Turf Mix provides a beautiful, dark, lush green lawn for your home! Rapid Turf Mix is made up of three improved Perennial Ryegrass and one improved Kentucky Bluegrass variety. Rapid Turf Mix includes only varieties that have excellent to very good ratings for disease, genetic color, density and over-all turf quality. Rapid Turf Mix is an excellent choice for new lawns/sports fields or for interseeding into established areas.

SEEDING RATE

New Lawn 5-6 lbs/1,000 sq. ft.
Interseeding 3-4 lbs/sq. ft.

Sunlight needed	Full Sun
Soil Types	Loams
Maintenance	Medium
Fertility	Medium
Traffic	Good

NOTES ON PROPRIETARY KY BLUEGRASS:

Kentucky Bluegrass is the most popular type of lawn grass in the Midwest. Proprietary bluegrass varieties are very dark green and beautiful. Kentucky Bluegrass also mixes well with ryegrass to provide a very nice lawn. Bluegrass takes the most maintenance of any turfgrass and will go dormant before ryegrasses and tall fescues. Bluegrass generally germinates in 20-25 days.

NOTES ON TURF-TYPE PERENNIAL RYEGRASS:

Ryegrass varieties in Rapid Turf Mix are very dark green and durable. Ryegrass varieties in Rapid Turf mix are selected for enhanced gray leaf spot resistance. Ryegrass exhibits quick germination and provides quick ground cover to hold the soil. Ryegrass often goes dormant after bluegrasses. Ryegrass generally germinates in 7-10 days.
