

## Ginger Forage KY Bluegrass

### FEATURES

- Forage type bluegrass with wide leaves and relatively tall growth
- Well adapted for use in pasture
- Grows well in cooler weather
- Should be mixed with other forage grasses

Kentucky bluegrass has been long utilized in pastures and hay fields in the Midwest. It should be mixed with other grasses. It is high in forage quality, matures early in the season, and tolerates close grazing.

Ginger is a high quality and palatable grass suitable for all classes of livestock.
