

# PROBLEM SOLVING SOLUTIONS

# TIPS

## SHORELINE WEED CONTROL

- » Effective herbicide treatment for emergent weeds along shoreline
- » Non-selective: Kills vegetation that receives foliar treatment down to the root

## SUBMERGED WEED CONTROL

- » Fast kill of surface and submerged weeds; non-selective
- » Effective in burning off Duckweed and Watermeal Mats

## SURF

- » Surfactant that adheres the herbicide treatment to weeds
- » Use with Shoreline for foliar applications and Submerge to enhance submerged weed treatments

- » Know your pond:
  - Surface area = (length x width) divided by 43,560
  - Acre Feet = surface area x depth in feet
- » Keep written records as to the time of applications, products used and results
- » Identify the problem; weed or algae, prior to choosing a treatment method or products
- » Know the water restrictions before treatment
- » Apply according to recommended rates and timing
- » Re-application of most chemicals to weeds/algae will be necessary to keep a healthy environment
- » Pond health benefits from the use of aerification

# POND<sub>2</sub>O™

BEAUTIFULLY  
SOLVING YOUR  
POND PROBLEMS

The **CISCO** Companies

# BEAUTIFICATION TO ENHANCE

## POND DYE WITH SUSPEND TECHNOLOGY

- » **POND<sub>2</sub>O** concentrated lake and pond colorant with suspend technology to extend color and enhance water depth
- » **Blue** creates the classic effect
- » **Black** gives a mirror-like appearance
- » **Bahama Blue** provides tropical results from the blue and yellow dye combination

## BIO LIQUID AND WSP WITH BIO START

- » Natural muck and sludge removal in water with heavy organic debris loads
- » Enhances natural bacteria to aid in decomposition of sludge and bottom muck
- » Create a healthy pond environment and add years to your pond's life

## ALGAECIDE WITH STABITROL

- » Treatment for killing floating, submerged and planktonic algae in ponds/lakes
- » 30 day residual suspension using Stabitol technology to aid in control of algae
- » 100% safe water use immediately
- » Do not use in koi or trout ponds - Toxicity is directly related to water softness

## POND DYE WITH SUSPEND TECHNOLOGY WSP

- » Enhance water depth with super concentrated dye that stays in suspension longer
- » Convenient water soluble throw pack application method
- » Available in **Blue** or **Black**

# PROBLEM SOLVING SOLUTIONS

## BIO MUCK BLOCKS

- » Natural muck and sludge removal for specific areas in ponds and lakes
- » Super concentrated Bio Enzyme Spores release billions of enzymes and micro-nutrients

## COPPER SULFATE

- » Dry copper sulfate granules for pond algae control
- » Treatment for killing floating, submerged and planktonic algae in ponds/lakes

## FOUNTAINS & BUBBLERS

- » Breathe life into your pond with our fountains and bubblers
- » Help keep your pond clean and healthy for a longer period of time by adding aeration
