## Drought Buster Mix

---

### FEATURES

- Specially formulated for cattle and goats for high animal production
- Displays excellent drought tolerance and very high tonnage of outstanding forage
- Can take tough growing conditions
- Best to rotationally graze

### PERENNIAL MIX FEATURES

Plant type: Short lived perennial mix  
Planting dates: Late March–April, Aug–Sept  
Soil pH: 6.0–7.0  
Soil adaption: Wide  
Planting depth: 1/8”–1/4”  
Approximate seeds/lb: 183,000  
Seeding rate: 25 lbs/A  
Days to germination: 7–14  
Main usage: Pasture, grazing  
Height at maturity: 3’  
Length of stand: 2–3 years  
Reproduces by: Seed

### FORMULATION

30% Tekapo Orchardgrass  
25% Endure Chicory  
25% Gallant Red Clover  
10% Feast II Short Rotation Ryegrass  
10% Kopu II White Clover

---

In the drought of 2012, this mix was the only forage we saw that did not go dormant.

---

Enduro-Plus consists of only the best forage varieties available. All varieties in the Enduro-Plus product line have been developed and tested for forage quality, yield, and persistence. These products have been designed to give you higher relative feed values, which translates into more milk per acre, more beef per acre, or more energy for horses.
