

HayMaster Grass Mix

FEATURES

- Excellent companion for alfalfa
- Excellent for all-grass hay
- Excellent season-long production (multi-cut mixture)
- Outstanding winterhardiness
- Responds well to nitrogen/manure applications
- Produces under tough hot, dry conditions

PERENNIAL GRASS MIX FEATURES

Plant type: Perennial grass mix
Planting dates: April–May, Aug–Sept
Soil pH: 6.0–7.0
Soil adaption: Wide
Planting depth: 1/8”–1/4”
Approximate seeds/lb: 183,000
Seeding rate: 25–30 lbs/A ; 5–15 lbs/A mix
Days to germination: 7–14
Main usage: Pasture, baling, nurse crop
Height at maturity: 3’–4’
Length of stand: 4–8 years with good management & fertility
Reproduces by: Seed

FORMULATION

50% MacBeth Meadow Brome
50% Preval Meadow Fescue

Meadow brome and meadow fescue are species that have shown tremendous production under tough growing conditions and varying soil types.

Enduro-Plus consists of only the best forage varieties available. All varieties in the Enduro-Plus product line have been developed and tested for forage quality, yield, and persistence. These products have been designed to give you higher relative feed values, which translates into more milk per acre, more beef per acre, or more energy for horses.
